

# FOCUS

Self Service Solutions

## GALAXY

### Overview

The Galaxy kiosk, our most multi-functional model, is attractive, secure and adaptable.

Suitable for integrating printers, currency acceptors and dispensers, biometrics, license scanners and many more applications, the Galaxy kiosk can be an hotspot kiosk, a payment center, an interactive directory, a dynamic point-of-sale and much more.

The Galaxy has near-limitless promotional and self-service potential across a wide array of fields, such as tourism, education, communications, light industry and gaming.

The flexible Galaxy can conform to your proprietary applications, seamlessly incorporated into our off-the-shelf or designed-to-spec software. And the Galaxy kiosk has full frontal access, crucial for retail services.
